

ATG ACCESS

ATG Access
168/900

ATG Access 168/900 bollard is the ‘big sister’ of the 114/900. It was originally designed to complement the automatic bollard range but has since been utilised where a larger diameter bollard is the aesthetic choice or to create a visually more challenging deterrent to would-be-thieves or ram-raiders.

The ATG 168/900 is utilised where visibility may be an issue, the increased height brings the bollards to the attention of pedestrians

The ATG 168/900 is available in all RAL colours and stainless steel. Our unique lift-assist mechanism enables us to supply heavy duty robust security solutions which can be utilised by all. This is possible because the mechanism reduces the product lifting weights by between 70 and 85%.

Products fitted with lift-assist have an integral mechanism which reacts when the user begins to raise the bollard and smoothly assists the rising of it into the locking position. The mechanism also acts as a damper when lowering the bollard.

Finishes available	Black, galvanised, stainless steel & RAL colours
Lift Assist	Yes
Height	900mm
Wall thickness	6mm
Optional Extras	Sold secure lock
Diameter	168mm
